ABOUT ME

As a dedicated student passionate about business analysis, I excel at identifying business needs and providing solutions. With skills in statistical analysis, data visualization, and process improvement, I am proficient in Python, SQL, Power BI, and Excel. Driven by curiosity and continuous learning, I am eager to leverage my analytical mindset and problem-solving abilities to contribute to a dynamic organization's success as a Business Analyst.

PROJECTS

- **IPL 2023 player auction**
  - - Developed an interactive dashboard using Power BI to visualize IPL 2023 player auction data.
  - - **Key Features:** Player performance metrics, Team budget utilization, Auction trends and insights.
  - - **Technologies Used:** Power BI, Excel, DAX

- **Marvel Cinematic Universe**
  - - Created a comprehensive dashboard to track and analyze various aspects of the Marvel Cinematic Universe.
  - - **Key Features:** Movie release timelines, Box office performance, Character appearances and connections.
  - - **Technologies Used:** Power BI, SQL, DAX

- **Time spent on social media**
  - - Designed a dashboard to analyze user engagement and time spent on different social media platforms.
  - - **Key Features:** User demographics, Platform usage trends, Engagement metrics.
  - - **Technologies Used:** Power BI, Python, SQL
